Now the unit vide letter dated 19.12.2022 has informed that they had obtained permission for procuring HSD 24 KL per month from 01.04.2022 to 30.09.2022. Before obtaining the permission to procure diesel (HSD) they had presumed that both boilers will be operated. Based on such assumptions, they have obtained permission to procure 24 KL per month. However, they could not start the coal/Briquet boiler within the timelines due to delay in qualification of coal boiler & vendor installation issues. Hence, they could use only the diesel boiler to generate steam required to start trial and validation batches in the fermentation block.

Further, they have informed that since their plant is yet to commence regular production and running on trial basis, they could not arrive at the actual quantities of fuel (HSD) required to operate during the trial period. Once they reach the stage of commercial production, they will be in a position to assess the actual requirement. In this scenario, against the approval for 24KL HSD per month for 6 months (Apr-Sep'22) total 144 KL, they procured 372 KL HSD from Apr 2022 to Sep 2022 (228 KL in excess). Since there are multiple activities taking place, they have lost focus of HSD permission limits for procurement. It is humbly requested to condone the same. Further, from October to November 2022, we have procured 96 KL, we humbly request your good self to condone the omission and commissions in this regard.

As per the permission they can procure 24 KL/ month, for the period from April 2022 to Sept 2022.

2) In this connection, they have submitted that, theirs is a new unit and is on trial run and are yet to commence commercial production. Because of this and also due to multiple activities being carried out simultaneously in their unit, they have lost focus and procured more than the quantity permitted (total procured quantity is 372 KL in- which excess quantity is 228 KL) for the period from Apr-22 to Sep-22; Also procured 96 KL for the period from Oct-22 to Nov-22) and requested to ratify the excess procurements. They also informed that-

i) they have facility of two boilers - one operated on HSD and the other on Coal / briquettes;

ii) the original request for HSD was made thinking that, both the boilers will be in operation from April 2022 onwards. But the coal boiler was commissioned after necessary quality checks and State government approvals in the month of November 2022; and

iii) the HSD boiler only had to be used throughout the period, thereby causing excess consumption.

3) For the further period, from Dec-2022 to May-2023, they requested for HSD procurement of 720 KL(120KL/month).

4) In this connection, the documents relating to HSD procurement, the records maintained by the unit for procurement and utilization have been verified. As per the documents furnished by the unit, the coal boiler was put to use during November, 2022 after the certification of Director of Boilers. Since the findings as per the documents are in line with the submissions made by the unit, the request of the unit for ratification of excess procurements and approval for future procurements may be considered.

The request of the Co-Developer for ratification of excess procurements and approval of enhancement of quantity of Diesel from 24 KL to 372 KL for the period of six months is placed before the Approval Committee for considerations.
